

**Addendum: An Assessment of
Environmental Problems Associated with Recycling of
Hazardous Secondary Materials**

**Appendix 3: Analysis of Recycling Damage Cases that
Are Also Intermediate Facilities**

Analysis of Recycling Damage Cases that Are Also Intermediate Facilities

Site Name	BR Indicates Intermediate Facility	Damage Case Study Text Indicating Intermediate Facility
Alternate Energy Resources, Inc.	Yes	
Aqua-Tech Environmental, Inc. (Groce Laboratories)	Yes	
Baron Blakeslee	Yes	
Bay Zinc Company Inc.	Yes	
Beacon Battery Company		Batteries that cannot be reconditioned are sent for off-site smelting.
Bergsoe Metal Corporation		Batteries, among many items, were delivered to the plant and smelted to produce elemental lead, which was further refined and alloyed. Battery casing chips were washed and sold for recycling.
Boro Auto Wreckers		An auto salvage and scrap metal recycling facility. The metal was crushed, stripped of non-metallic materials, weighted, and shipped offsite for recycling.
Boulden Incorporated	Yes	
Breslube-Penn, Inc.		Operated as a waste oil transfer station from 1986 through late 1991 when operations at the facility ceased.
Chief Supply/Greenway Environmental	Yes	
Clayton Chemical Company	Yes	
CleanCare Corporation		Crushed oil filters for off-site recycling by other facilities. Also stored hazardous waste from WDOE for transport to another facility for final treatment and/or disposal.
Cooper Drum Co.		Operated as a drum recycling operation where settled-out contents were pumped out and transported off site for recycling or disposal.
Cycle Chem Incorporated	Yes	
Delatte Metals		Spent acid from the battery reclamation facility was shipped offsite for recycling. The recovered lead from the acid was sold to lead recycling facilities located throughout the southern US and other countries.
Dixie Oil Processors, Inc.		Oil recovery business that for a period of time stored wastes on site and transported them off site for disposal or recycling.

Emerald Recycling		Oil and gasoline filters are drained and crushed on site, and the metal is sent off site for metals reclamation at Nucor Steel. Antifreeze and solvent reclamation activities do not take place at this facility but drummed wastes may be held at the 1
Encycle/ Texas Inc.	Yes	
Environmental Processing Services	Yes	
Environmental Waste Resources, Inc.	Yes	
GNB Incorporated (Exide Technologies)	Yes	
Heritage Environmental Services	Yes	
High-Tech Now		Processed computer equipment by shredding it prior to sending it off site for metals recovery.
Horseshoe Road	Yes	
Hydromet Environmental USA Incorporated	Yes	
Industrial Solvents and Chemical Co.	Yes	
J. C. Pennco Waste Oil Service		Received used barrels and various chemicals. Most of the oil and other chemicals were sold to recyclers.
Joe Sikes Oil Service, Inc.		Collects, bulks, and distributes used motor oil. The facility still receives various types of waste oil from industrial sources until it can be transported to processing facilities.
Mercury Refining, Inc.	Yes	
National Oil Services	Yes	
Old Bridge Chemicals, Inc. / Madison Industries	Yes	
Queen City Barrel Co.	Yes	
Quicksilver Products, Inc.	Yes	
Refined Metals Corporation	Yes	
Revere Smelting and Refining Corporation of NJ	Yes	
Rho Chem Corp	Yes	
River Recycling Industries, Inc.		Slag from smelting operations is sold to other smelters for further refining.
Safety Kleen Corporation	Yes	
Safety-Kleen (Hebron)	Yes	
Safety-Kleen (San Jose Facility)	Yes	
Safety-Kleen Corporation, Reedley Recycling Center	Yes	
Safety-Kleen Corporation, Rohnert Park	Yes	
Safety-Kleen Systems, Inc.	Yes	

July 2008

Sierra Battery Sales		The facility bought and sold used automobile batteries and stored non-sellable batteries in the alley prior to shipment off-site for recycling.
Waste Research & Reclamation Co.	Yes
